Alberto Mandara

Second University of Naples – Italy

Workshop in Prague, 30-31 March 2007

COST C26

Urban Habitat Constructions under Catastrophic Events

EARTHQUAKE RESISTANCE

WG 2 Session, March 30th

CONCLUSIVE REMARKS

By Dan DUBINA & Alberto MANDARA

Let's not forget the COST C26 Seminar (spring 2008):

- New and original contributions are expected;
- The investigation of some specific aspects is envisaged;
- A more general framing of the WG2 topic is expected to be achieved;
-

COST C26

Urban Habitat Constructions under Catastrophic Events

EARTHQUAKE RESISTANCE

WG 2 Session, March 30th

CONCLUSIVE REMARKS

By Dan DUBINA & Alberto MANDARA

In particular, the following questions still remain open:

- Characterization of seismic action for the global performance analysis;
- Evaluation of building vulnerability at an urban scale;
- Definition of the robustness demand;
- Extension of the robustness concept to existing buildings;
-
